Our independent homeland is also celebrating its 34th anniversary. During this period, our people have gone through various trials and hardships. Despite these difficulties, this ancient homeland is increasingly beautiful and is advancing towards its goals. Our hardworking people are working honestly every day for the prosperity, beauty, prosperity, peace and tranquility of our country, living in the spirit of loyalty to our national values. Over the past five years of our independence, great creative work has been carried out. In particular, our cities and villages have become prosperous, new structures have been built, and the lifestyle of the population has significantly improved. Mosques and madrasas, schools and kindergartens have been built, and existing ones have been renovated. Freedom of speech and religion has been strengthened, and the number of people praying in congregation has been increasing. Grand projects are being implemented in our country, if we look at the example of the Baghdod district of the Fergana region, a beautiful town has been built in the residential complex of our district "Muruvvat" MFY. The houses in the town were built with comfortable and desirable conditions and handed over to their owners. A palace of culture, a school and kindergarten, a sports complex, greenhouses to ensure employment and good income for the population were built and put into operation in the town. Higher education The application process and entrance exams for universities have been simplified, with the aim of increasing the intelligentsia and enriching society with talented personnel. A number of benefits have been created for children from low-income families to enter higher education institutions and participate in the educational process. Young people included in the "Youth Book" are provided with preferential loans and excellent conditions for starting their own businesses.

It is clear from this that all the efforts of our head of state are spent on the path of a happy and prosperous future for us, the youth, and we, in turn, must respond to any call of our president with a "labbay" in harmony with such nobility. After all, we must not forget that scientists who amazed the world have grown from this sacred land, and we, the youth, must become worthy successors to them.

All the achievements achieved during the period of independence are a bright result of the unity of our people, tireless labor and boundless love for their Motherland.
