Introduction

The preschool education system is the most important period for the development of children. During this period, children receive the necessary foundations for the formation of their personality, the development of social skills and the preparation for the educational process. Educators play an important role in this process, as they participate in educating children, educating and developing them. Educators are also important in working with parents, understanding the needs of children and supporting them.

The requirements for educators in modern society are constantly changing. They need to have not only pedagogical knowledge, but also social and emotional skills, innovative approaches. This article analyzes in detail the modern requirements for educators of the preparatory group of preschool educational organizations, their importance and role in the educational process.

1. Educational requirements

Educational knowledge is important for modern educators. Educators:

- Pedagogical knowledge: Educators should have in-depth knowledge of child psychology, pedagogical methods and teaching strategies. This knowledge helps educators understand children's needs and effectively apply them in the teaching process.
- Innovative approaches: They should have the ability to use modern teaching methods, including game-based learning, design and interactive methods. Game-based learning increases children's interest and encourages them to actively participate.

2. Professional qualifications

Professional qualifications and experience are important for educators. They:

- Continuously improve their skills: They should monitor innovations and innovations in the field of preschool education, acquire new knowledge and skills by participating in seminars, trainings and master classes. This, in turn, improves their pedagogical activity.

-
- External and internal evaluation: Educators should regularly conduct an analysis to evaluate and improve their activities. This process can be carried out through self-assessment and exchange of ideas with colleagues.

3. Social and emotional skills

Modern educators need to have social and emotional skills:

- Communication with children: Educators should establish a sincere, kind and understanding relationship with children. This helps children feel comfortable and express their thoughts freely.
- Cooperation with parents: Educators should improve the educational process by establishing effective communication with parents and taking their opinions into account. Constant communication with parents helps to monitor the development of children and understand their needs.

4. Use of innovative technologies

The use of innovative technologies is very important for modern educators:

- Digital tools: Educators should have the ability to use digital educational resources, prepare multimedia materials and use them in the educational process. This allows to increase children's interest and make the educational process more interactive.
- Online education: During the pandemic, many educators have been forced to use online learning platforms. They need to continue and develop this experience, as online education provides children with access to new opportunities and resources.

Conclusion

The requirements for educators of the preparatory group of modern preschool educational organizations are aimed at making the educational process more efficient and high-quality. Educators need to constantly improve their knowledge and skills, establish effective communication with children and parents, and use innovative technologies. These requirements serve to further improve the proper development of children and the educational process.

This article highlights the importance of considering modern approaches to improving the quality of the education system, improving the skills of educators, and positively influencing the development of children. To increase the effectiveness of the education system, it is necessary for educators to work together, share knowledge, and use innovative approaches.
